Stop of the Recall

Referring to the recall of June 2018 regarding the cylinders 2016 und 2017, we would like to inform you following:

As in the report -published on our webpage- the corrosion had been created due wrong handling or storage by the Enduser, against the instructions of the producer.

Therefore any liability of Morini is completely excluded.

There is no risk for anybody, if the End user treat carefully und with due care the pistol and cylinders, clean only with a dry mop, don't use aggressive products or oil, storage the pistol in a safe and dry place, not refill the cylinders through an unsafe and dirty hand pump or bottle and refill slowly the cylinders and never over the limit admitted.

The recall is now terminated.

Thank you for your attention.

Best regards

Morini Competition Arm SA

Dr.iur. Sylvia Repich-Lips
